Importance: High

Hello – Just an FYI to let you know I scheduled the site after reporting to ASB that you were providing the extra funds from your removal support funds. Ray will be working with you, Susan and Carlene on the PR. I also want to let you know the following:

- 1) The turnaround time was changed from 14 days to 21. The cost would be significantly higher!
- 2) Lab QC for the VOAs and BNA analysis was declined. Lab QC is required for Pesticides, Aroclors, Metals and Hg. This means that you will not collect extra volume nor designate a sample for lab QC for the VOA and BNA analysis. If you disagree about the VOA and BNA, please let me know ASAP.
- 3) We no longer supply tags. Please let me know if the contractor will use tags for this sampling event.

I will forward the CLP sample numbers and container requirements by next Tuesday.

If you have any questions, please do not hesitate to contact me or Ray.

Take care,

Myra Perez
